HZZO-DS Mousepads Soft

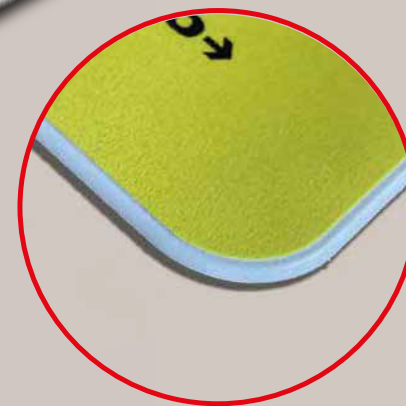

A4- 297 x 210 mm.

Classic heat-sealed mouse pads with durable advertising print.

The top layer is made of 0.3 mm PVC foil with **high-resolution CMYK digital printing** (printed on the inner side for high abrasion resistance). The bottom layer consists of anti-slip PVC grey color foam, approx. 1.2 mm or 1.5 mm thick.

Around the printed area, a **distinctive white border of 2-3 mm** is created by the **H.F. (high-frequency) heat-sealing process** an essential finish that frames the print and ensures a clean, aesthetic edge. The mouse pads also feature **rounded corners**, ensuring a long-lasting and professional finish.

HZZO-DH Mousepads Hard

A4- 297 x 210 mm.

A rigid version of the advertising mouse pad with **high-resolution CMYK digital printing**. The top layer is made of 0.3 mm PVC foil, printed in full CMYK digital quality, bonded with an **additional stiffening PVC layer of 0.4 mm** — giving the pad a firm, solid structure. The bottom layer consists of anti-slip PVC grey color foam, approx. 1.2 mm or 1.5 mm thick. The H.F. (high-frequency) heat-sealing process creates the characteristic **white border of 2–3 mm around** the printed area, ensuring a clean, durable, and professional finish with rounded corners. This version is ideal for customers who prefer a stiff, **desk-mat style mouse pad with a premium feel**.
